

Product Change Notification – CableLine®

Dear Madam or Sir,

As of the 31st January 2018, the articles listed below will be supplied in a modified version. Please pass this product information on to your employees and, if needed, to your customers. All modifications are performed to improve the product.

1. Initial situation

Current CableLine® wire markers are printed by a laser printing system. Therefore the visibility of the print, especially on dark colored markers, is not sufficient. The print of a deep black or a white font is not possible with the laser marking technology.

2. Technical change

The print technology will be changed from laser printing to hot stamped printing. This develops a deeper black printed font as well as the possibility to print in white on dark colored markers. As shown on the figure below this modification improves the visibility of the print.

3. Reason for change

In order to react to criticism of the bad visibility of the print this modification has been initiated to improve the legibility of the CableLine® range. Through the switch in printing technology from laser based to hot stamping, a greater contrast can be achieved.

5. Availability

At the end of January in 2018 we will clear out our old stock and replace all old articles to reduce the risk of mixed deliveries. From this point onwards only new articles with hot stamped print will be delivered. The article numbers of the aforementioned products will not be changed.

We are very sorry for all the inconveniences caused and are doing everything to conduct this product change as smoothly as possible without disturbing delivery times and general functions.

For further questions please contact your sales office directly. All contacts for sales representatives are available here: www.weidmueller.com/contact

Best regards
