

Technical change to RSF S/ Compact family

Dear Madam or Sir,

The above listed articles will be supplied in a modified revision. Please pass this product information on to your employees and, if needed, to your customers. All modifications are performed for reasons of product improvements.

1. Initial situation

RSF S/ Compact had no UL approvals and were delivered with LP3R connectors which will be obsolete very soon. They were also delivered with Dekafix.

2. Technical change

Based on continuous improvement the LP3R connectors used in RSF S/ Compact will be replaced by LL3R connectors + pad printing technology. Furthermore, to fulfil with UL approvals, the product label has been changed to include the UL logo with its file number (c  us) and the UL ratings below.
UL ratings: 60VUC / 1A

Cancellation

LP3R 5.0x/90

Matting
compatibility

Substitution

LL3R 5.0x/90

3. Reason for change

Obsolescence of LP3R connector range and addition of **UL-recognized** approvals () on the label for these products, making each interface UL recognized.

4. Availability

Current products in stock still have old connectors. They have compatibility indicator 0 and 1. Since today new productions will be with new modifications detailed above. This will be reflected on its KKZ or compatibility indicator. For those which currently have KKZ 0 will be upgraded to KKZ 1; and for these that have KKZ 1 will be KKZ 2. As time goes on, products with old compatibility codes 0 and 1 will decrease until end of stock following a FIFO process.

5. Affected parts
